

Making Rhyming Word Wheels

Materials

- paper
- scissors
- brass fasteners
- crayons or markers
- oaktag/contact paper/
lamination machine (optional)

How-to's

Each rhyming word wheel is created from two pages: one shape wheel and one word/picture wheel. The wheels can be constructed by you, parent volunteers, or your students. Here are the easy directions:

1. Photocopy both parts of the wheel.
2. Color or invite children to color the shape wheel and the pictures on the word/picture wheel. (If you like, paste the pages to oaktag and/or laminate them for added durability.)
3. Cut out the shape and picture/word wheels. Cut out the window and door along the dashed lines.
4. Place the shape wheel on top of the word/picture wheel. Align the crosses in the center as shown.
5. Push a brass fastener through the crosses and open to secure. Now you're ready to turn to learn!
